(1) *Solicitation and Award of Contracts.* If concerning a matter outside of the Tribal Trust lands, unless otherwise modified by contract signed by duly authorized Tribal Council representative or by funding obligations outside the control of Tribal government, the Cowlitz Tribal Court shall have jurisdiction over an action between the Tribe and a bidder, offeror, or contractor, prospective or actual, to determine whether a solicitation or award of a contract is in accordance with the Constitution, statutes, policies, and the terms and conditions of the solicitation. The Tribal Court shall have such jurisdiction, whether the actions are at law or in equity, and whether the actions are for monetary damages or for declaratory, injunctive, or other equitable relief.

(2) *Debarment or Suspension.* The Cowlitz Tribal Court shall have jurisdiction over an action between the Tribe and a person who is subject to a suspension or debarment proceeding, to determine whether the debarment or suspension is in accordance with the Constitution, statutes, and policies. (3) *Actions Under Contracts or for Breach of Contract.* The Cowlitz Tribal Court shall have jurisdiction over an action between the Tribe and a contractor, for any cause of action which arises under, or by virtue of, the contract, whether the action is at law or in equity, whether the action is on the contract

(4) *Limited Finality for Administrative Determinations.* In any judicial action under this Section, factual or legal determinations by employees, agents, or other persons appointed by the Tribe shall have no finality and shall not be conclusive, notwithstanding any contract provision, regulation, or rule of law to the contrary, except as provided in Section 3-701 (Finality of Determinations).

Addendum A – SCOPE OF WORK

1. **Scope of Work**

Task 1: Construct Archaeological Screening System

- See site preparation details below; also see Figure 1

Task 2: Maintain Archaeological Screening System Function

- Use mechanized equipment to transport stockpiled sediments to screening platform and consolidate waste rock spoils
- Maintain functionality of water conveyance and sediment dewatering systems

2. **Site Preparation Details**

Water Supply

- Temporary water storage structure= tank or bag with ~15,000 gallon capacity
- System pressure = 80 pounds per square inch (PSI) (assumed typical residential pressure)
- Water distribution = up to four (4) 5/8-inch garden hoses operating simultaneously
- Peak demand = 32 gallons per minute (GPM)
- Recommend ~15,000 gallon temporary water storage tank or bag

Screening Pad

- Temporary paved surface using hot mix asphalt or Portland cement concrete underlain by rock/sand fill is recommended
- Surface should slope 2-3 degrees for drainage
- Silt fence is recommended along the perimeter where drainage occurs
- Scour apron to catch and direct wastewater into a catchment basin
- Catchment basin to collect pump wastewater into dewatering system

Screening Station

- Four archaeological box screens fitted with ¼” wire mesh screen with 1/8” inserts
- Screens must have ability to discard waste rock onto the screening platform, either through a removable screen insert or with hinges to allow dumping
- Standard 5/8-inch garden hoses with spray nozzles

Dewatering System

- Baker tank (decanting tank) or dewatering bag(s)
- Input capacity= 32 GPM
- Total sediment storage volume < 570 cubic yards
- Scour apron to catch and direct decanted water into a catchment basin
- Catchment basin to collect and pump (recycle) decanted water back into water storage structure

Offroad Access

- NRCS web soil survey mapping identifies the native in situ soils as Gee silt loam, which typically exhibits poor trafficability and compaction characteristics, rendering it unsuitable for reuse as pathway surfacing material. Imported granular material will likely be required for access routes and work areas.

3. **Deliverables**

- Complete construction and installation of archaeological screening system elements
- Repatriate screened sediments and turbid screening water (following completion of screening activities)
- Site cleanup
